EAP220: Saving archival documents of archaeological researches conducted during the 1920s and 1930s in Ukraine

Dr Victoria Kolesnikova, Independent Researcher
2008 award - Pilot project

The survey consists of the following parts:
- History of the collection Page 1
- Methods used in carrying out the survey Page 2
- Survey of the archival collections Page 3
- Short resume Page 11
- Types of material held at each institution Page 12
- List of items grouped by material type
  1) Documents Page 13
  2) Scientific Reports Page 15
  3) Field Diaries Page 18
  4) Card Diaries Page 23
  5) Inventory Books Page 111
  6) Drafts Page 114
  7) Pictures Page 129
  8) Glass Negatives Page 138
  9) Photograph Albums Page 210
  10) Film Page 214

THE HISTORY OF COMPILATION AND THE FATE OF THE ARCHIVAL DOCUMENTS COLLECTION RELATED TO THE ARCHAEOLOGICAL EXPEDITION LED BY T. MOVCHANOVSKY IN VILLAGE RAJKI

The history of investigation of the Rajki hillfort started in 1925, when T. Movchanovskiy observed the Rajki hillfort for the first time when he was the director of the museum in Berdychiv. Between 1929-1932 the Berdychiv Museum staff, led by T. Movchanovskiy, ran essential archaeological research of the Rajki hillfort. So called ‘open leaves’ – permissions for archaeological work were issued by the Ukrainian Committee of Cultural Memorials Preservation by the National Education Commissariat of Ukraine (NKO), based on recommendations of the All-Ukrainian Archaeological Committee (VUAK) of the All-Ukrainian Academy of Sciences (VUAN). In line with due instruction, the researchers were to submit to the VUAK appropriate scientific documentation regarding the completed work. That is why T. Movchanovskiy sent the reports for that period to VUAK. These documents are currently stored within the Scientific Archive of the Institute of Archaeology (the collection is entitled ‘VUAK-IHMC’), together with documents on investigations of other archaeological memorials. Copies of the reports and other field documentation were kept in the Berdychiv Museum.

In 1933, T. Movchanovskiy was employed at the Kyiv Institute of History of Material Culture (IHMC). This institution was established as a result of the rearrangement of the VUAK. It is likely that T. Movchanovskiy transferred documentation on expeditions stored at the Berdychiv museum to Kyiv. Between 1933 and 1935 excavations in Rajki were further conducted by the staff of the IHMC (again supervised by T. Movchanovskiy). Documentation on research during this period were also submitted to the IHMC. Documents that T. Movchanovskiy brought from Berdychiv and those on research from 1933 to 1935 are at present at the Scientific Archive of the Institute of Archaeology (the collection is entitled ‘VUAK-IHMC/Rajki’). Probably, this collection attained its present form only after the shooting of T. Movchanovskiy in 1938.

In the Scientific Archive of the Institute of Archaeology you can also find a private collection of T. Movchanovskiy. In addition to the documents of the expedition in Rajki it contains other documents related to the scientific activity of T. Movchanovskiy. It is unknown under what circumstances and when exactly this collection was created.

During the Second World War when Kyiv was occupied (1941-1943), the documents of the archive of the Institute of Archaeology came to harm and part of them were irreversibly lost. In addition, the archival documents were transferred from one building to another several times as the Institute of Archaeology changed its location. This also affected the state of collections, all documents of the Scientific Archive of the Institute of Archaeology were finally managed as recently as the 1960-70s.

During the post-war period, many scientists intensively studied some part of the expedition material stored at the Scientific Archive of the Institute of Archaeology. It is probably that former rules on documents storage allowed to partial removal of the archival documents, so sometimes the expedition materials on Rajki can be found within the private collections of scientists (for example, in Dmitrov’s collection).

Accordingly, the majority of documents regarding the Rajki hillfort excavations were accumulated in the Scientific Archive of the Institute of Archaeology of the NASU in different ways and at different times. However, documents related to that expedition, sometimes got into other archival institutions, becoming a part of collections of various organisations (financial documents, material connected to organisational matters of the expedition, permissions for excavations, official correspondence etc.) All these materials are
not in one place, but relate to the whole archive. Scientific material related to investigations of the Rajki hillfort are part of private collections of various researchers, especially of the Rajki expedition participants.

We also predicted that archival documents would be kept within museum holdings, to which a part of the document collection on Rajki came in 1950-1970. Along with archaeological material, museums could have also obtained part of field and museum documentation (with description of places and time of discovery stated).

As shown, materials regarding the expedition have never been put together to make a single collection. They appeared at different times in different places, were arranged by various people who had no relation to the expedition itself. There are no unified principles of material structure.

METHODS USED IN WORK

Basing on the information we had prior to the start of the project, we compiled a list of archival institutions (more than 20), which could possibly contain archival documents of the Rajki expedition. In some cases we were certain that relevant documents were held at particular archives, though in other cases we just made assumptions in view of some indirect information.

The search inside the archival institutions followed the next principles:

- **Chronological** – examination of archival documents dated 1920-1930’s, or documents with dates coinciding within the years of the archaeological collections transmission.
- **Geographical** – search of such names as: village Rajki, Berdychiv Area, Kyiv, names of other cities to which the archaeological collections were transmitted.
- **Author-based** – search among documents related to the names of T.Movchanovskiy, participants of the Rajki expedition, scientists who studied materials of the Rajki expedition after T.Movchanovskiy’s death and other people who visited the excavations.
- **Organisational** – search among documents of organisations, related to the places of work of T.Movchanovskiy (Berdychiv Museum, SIMC, IHMC, Institute of Archaeology) and organisations that supervised and financed the hillfort excavations (City Council of Berdychiv, VUAK, National Commissariat of Education of Ukraine), State security bodies of the USSR during the 1930’s (NKVD of Ukraine).

The search was performed with attention to the peculiarities of systematisation of archival documents in various archival institutions, as well as ways of registering collections of archival institutions in card-files and directories. In most archival institutions in Ukraine and Russia the way of collection systematisation has not been unified and displays the historically established system of organisation and storage of archival documents.

Sometimes the information discovered during work on the project served as a source for developing future searches of archival documents, and sometimes new information provided explanation of previously received facts or complemented them.

In addition to the document searching method, the following methods needed in the process of scientific research were applied: **analysis, synthesis, systematisation, comparative method, problem-thematic method**.

In connection with the use of these techniques in our work in conjunction with various records we have made, we have produced a large number of copies of preliminary drafts of documents (both digital and hardcopies) which were needed to compare documents, to organise them, to identify copies, to draw up lists etc. The draft copies were also necessary when working with large volumes of documentary material, which was important primarily for the collection content and for understanding details.
Thus for each archival institution we have compiled an array of material, which afterwards served as a basis for compiling the final list.

**SURVEY OF ARCHIVAL AND MUSEUM INSTITUTIONS, VISITED DURING THE PROJECT IMPLEMENTATION**

**The Scientific Archive of the Institute of Archaeology of the NAS of Ukraine;**

12 Geroiv Stalingrada Prospect. Kyiv, 04210, Ukraine.

The largest number of documents relating to research in Rajki comes from the scientific archive of the Institute of Archaeology. Documents are stored in 6 structural units of the archive: Collection ‘VUAK-IHMC’ (№ 20), the collection ‘VUAK-IHMC/Rajki’, T. Movchanovskiy private collection, the collection ‘Scientific Works’, collection of negatives on glass, L. Dmitrov’s private collection.

In addition to the search conducted in the scientific archive of the Institute of Archaeology, we studied other collections, which could possibly contain documents of the Rajki expedition. First of all in personal collections of various scientists, for example, in the personal collection of the expedition member V.P. Petrov. Unfortunately, these collections comprise no information of interest.

In general there are 1426 documents of the Rajki expedition stored within the NANU archive (given that number of documents, such as a report, may consist of more than 100 pages). The documents are distributed by categories as follows:

- reports – 4 documents;
- field diaries – 16 documents;
- card diaries – 438 cards;
- inventory books – 10 documents;
- drafts – 81 documents;
- drawings – 44 documents;
- negatives on glass – 425 plates;
- photographs – 350 photographs in 12 albums and a collection of photographs;
- organisational documentation – 32 documents;
- scientific works – 26 documents.

The physical condition and format of documents are different. In most cases the quality of documents is satisfactory. This is especially true for preservation of drawings and texts made in pencil. The physical condition and format of each document are specified in the lists we compiled.

All documents were issued as a result of the Rajki expedition, funded by the State. In the scientific archive of the Institute of Archaeology, this documentation was being collected during 1929-1938. More details about it are provided in the history of the collection.

In addition to the explanation regarding the copyrights that we provided earlier, we inform you that according to the Law of Ukraine ‘On National Archival Collection and Archival Institutions’: ‘All archival documents that have been accumulated due to operation of State bodies, State-owned enterprises, institutions and organisations – are of the State ownership.’ (Article 8). The Institute of Archaeology is the holder of these documents. Copying of documents is possible in case of getting an appropriate permission from the Director of the Institute of Archaeology, with reference to the document’s holder and author.

Access to documents is governed by rules approved by the holder under the legislation of Ukraine in the sphere of archival work.
Measures aimed to ensure physical preservation of documents, taken as a result of our work included administrative measures (regulation of usage of documents in the scientific archive of the Institute of Archaeology). Also, we tried to provide the archive with acid-free paper contributing to the physical safety of documents. Information about this method was obtained during the training in the Chersonese. However, until now this problem has not been solved due to lack of funding and lack of acid-free paper in Ukraine. Also, as the result of the project, we initiated work on digitisation of archival documents, using equipment purchased on funds provided by the project (at present we are engaged in copying of documentation on Ukrainian museums operation in 1919-1934).

The Institute of Manuscripts of the V.Vernadskiy National Library of Ukraine;  
62 Volodymyrska Str., Kyiv 04210, Ukraine. 

In the Institute of Manuscripts of the V.Vernadskiy National Library of Ukraine there is a personal archive of V.I. Maslov, one of the expedition members. Of greatest interest are photographs made by Maslov. Among them - several images of T.Movchanovskiy (only two photographs of the researcher were known until now). Also in the photo you can identify other participants of the expedition. Among organisational materials of the expedition there are unique documents relating to the household and domestic sphere of its activity. Using them makes it possible to reconstruct the life of the expedition, the diet of participants, the financial costs, etc.

In general the personal archive of V.I. Maslov contains 225 documents concerning the Rajki expedition. By categories of documents they are distributed as follows: reports - 1; field diaries - 3; inventory books - 2; photographs - 211; scientific works - 7; organisational documents - 1.

The physical condition of documents is mainly satisfactory; the documents format is different. The physical condition and format of each document are specified in the lists we compiled.

The Maslov's collection was transferred to the Institute of Manuscripts of the National Library of Ukraine upon his death. All the documents of interest from this collection are the result of scientific activity of V.I. Maslov, led while he was participating in the Rajki expedition, funded by the State.

According to the Law of Ukraine ‘On National Archival Collection and Archival Institutions’: ‘All archival documents that have been handed over from legal entities and individuals to the State archival institutions without retaining of copyrights/author’s rights, is the State's property’ (Article 8). The Institute of Manuscripts of the National Library of Ukraine is the holder of these documents.

Copying of documents is possible in case of getting an appropriate permission from the Director of the Institute of Manuscripts, with reference to the document’s holder and author. Copying is a payable service.

Access to documents is regulated by the rules, approved by the holder, in compliance with the Ukrainian legislation in the sphere of archival activity.

The Central State Archive of the Highest Authorities and Management (Kyiv);  
24 Solomyanska Str., Kyiv 03110, Ukraine.
In the Central State Archive of the Highest Authorities and Management, within the collection of the National Commissariat of Education (which funded the expeditions) we discovered a number of organisational documents. Basically this is correspondence between the expedition’s director T. Movchanovskiy and the National Commissariat of Education or the Committee for Protection of Memorials, on such topics as the expedition’s funding, food supply, schedules of archaeological work, staff lists, etc.

It should be noted that these documents do not constitute a single collection in the archive. Documentation relating to the activities of the Rajki expedition, is dispersed among various files (cases) of the Commissariat of Education collection. This complicated the search: we searched documents among the large number of cases, which coincided with dates during the expedition period.

Also of considerable interest are personal data (profiles) and autobiographies of T. Movchanovskiy and some other expedition members, stored within the archive.

Many documents have no connection to the archival material of the expedition, but instead they provide an opportunity to understand the context. In general with the purpose of copying we selected 15 papers: 13 organisational documents, 2 private files (profile and autobiography).

The physical condition of documents is mainly satisfactory; the documents format is different. The physical condition and format of each document are specified in the lists we compiled.

The Central State Archive of the Highest Authorities and Management of Ukraine is the holder of these documents. Access to documents is regulated by the rules, approved by the holder, in compliance with the Ukrainian legislation in the sphere of archival activity.

Copying of documents is possible in case of getting an appropriate permission from the Director of the Central State Archive of the Highest Authorities and Management (Kyiv), with reference to the document’s holder and author. Copying is a payable service.

The Central State Cinema- Photo- Phono Archive of Ukraine (Kyiv);
24 Solomyanska Str., Kyiv 03110, Ukraine.

In the Central State Cinema- Photo- Phono Archive of Ukraine (Kyiv) we discovered a videotape, which documents the research of the Rajki hillfort held in 1930.

A newsreel of the Rajki hillfort excavations is part of the major movie – a chronicle-newsreel (Part 7). The duration of the video is 2 minutes and 10 seconds. No audio track. The newsreel consists of several separate episodes (stories). The episodes are split by additional frames with text. The filmmaker was Mr. Solovyov, an Operator of VUFKU Department (State organisation on filmmaking and film distribution) in the city of Vinnitsa. Shooting of archaeological works was ordered by the Rajki expedition and paid from its budget. The film, as part of the newsreel, originally belonged to the State, and we found out that it had been shown in cinemas of the USSR in the 1930’s.

We were unable to assess the physical condition of the original film since, according to the archive rules, visitors do not have access to original material. The film was demonstrated by the archive staff on special equipment in the display room. Upon our request they prepared a copy of the newsreel in VHS format.

The Central State Cinema- Photo- Phono Archive of Ukraine (Kyiv) is the holder of these documents. Access to documents is regulated by the rules, approved by the holder, in compliance with the Ukrainian legislation in the sphere of archival activity.
Copying of documents is possible in case of getting an appropriate permission from the Director of the Central State Cinema-Photo-Phono Archive of Ukraine (Kyiv), with reference to the document’s holder and author. Copying is a payable service.

In spite of precise search inside the archive directory, we failed to find any other video- or photographic materials of the Rajki expedition in this archive.

The Central State Archive of Public Organisations of Ukraine (Kyiv)
8 Kutuzova Str, Kyiv 01011, Ukraine.

In the Central State Archive of Public Organisations of Ukraine, we have found ‘the case against T. Movchanovskiy’. In 1938, T. Movchanovskiy was arrested by Stalin’s Commissariat of Internal Affairs (NKVD), accused of anti-Soviet activity and then shot. The case was handed over from the Archive of Security Service of Ukraine to the Central State Archive of Public Organisations of Ukraine in the mid 1990’s. Until that time there was no access to cases of repressed people.

The case consists of two volumes (in total - 94 pages). It contains a collection of documents on athe prosecution of T. Movchanovskiy (records as regards the arrest and interrogation, evidences, conviction, certificate of execution, etc., documents are dated February 11 - March 08,1938), as well as papers on T. Movchanovskiy’s rehabilitation (dated February 11 – March 22, 1971). We have compiled a complete list of documents that are included and made copies of some pages.

The physical condition of documents is mainly satisfactory; the document format is different.

The Central State Archive of Public Organisations of Ukraine is the holder of these documents. Access to documents is regulated by the rules, approved by the holder, in compliance with the Ukrainian legislation in the sphere of archival activity.

Copying of documents is possible in case of getting an appropriate permission from the Director of the Central State Archive of Public Organisations of Ukraine, with reference to the document’s holder and author. Copying is a payable service. There are restrictions as to copying of documents, where any other names except for T.Movchanovskiy are specified (fact-finders’, witnesses’ names).

The St. Petersburg Department of the Archive of the Russian Academy of Sciences;
1 Universitetskaya Naberezhnaya, St. Petersburg 199034, Russian Federation

In the archive of the St. Petersburg Department of the Archive of the Russian Academy of Sciences there is a personal collection of L.A. Matsulevich (archaeologist, art researcher), where we found 2 diaries with remarks and sketches of artefacts from the Rajki hillfort excavations. The diaries were kept by L.A. Matsulevich during research trips to Ukraine. One of them was to Raiki (hillfort excavations) and Berdychiv museum - in 1930, the other - possibly in 1933. These documents are likely to have been transferred to the archive after his death.

The physical condition of documents is mainly satisfactory; the documents format is A5.

The archive of the Russian Academy of Sciences is the holder of these documents. Access to documents is regulated by the rules, approved by the holder, in compliance with the Russian Federation legislation in the sphere of archival activity.

Copying of documents is possible in case of getting an appropriate permission from the Archive Director, with reference to the document’s holder and author. Copying is a payable service, which is performed on request of a researcher exceptionally by the archive staff member.
The Photographic Archive of the Institute of History of Material Culture of the Russian Academy of Sciences (IHMC of the RAS);
18 Dvortsovaya Naberezhnaya, St. Petersburg 191186. Russian Federation.
The photo-archive of the IHMC of the RAS we found 3 albums with series of photographs (15 in total) from the excavations in Rajki. Photographs were made by Russian researchers Jakobson A.L., Karger M.K. and Matsulevich L.A. during their visit to Ukraine and, in particular, to excavation sites of the Rajki hillfort. The photographs have been previously unknown and thus are of great interest. Especially the photographs taken at an exhibition in Kiev in 1930, dedicated to field research (we had no information about this exhibition).
The physical condition of the photographs and their formats are different.
The Institute of History of Material Culture of the Russian Academy of Sciences is the holder of these documents. Access to documents is regulated by the rules, approved by the holder, in compliance with the Russian Federation legislation.
Copying of documents is possible in case of getting an appropriate permission from the IHMC of the RAS Director, with reference to the document’s holder and author.

The Manuscripts Archive of the Institute of History of Material Culture of the Russian Academy of Sciences (IHMC of the RAS);
18 Dvortsovaya Naberezhnaya, St. Petersburg 191186. Russian Federation.
In the Manuscripts Archive of the IHMC of the RAS there is a personal collection of G.F. Korzukhina, where we revealed photographs relating to the Rajki expedition. The photographs illustrate views of the Rajki hillfort and artefacts found during the archaeological research held on the hillfort territory. The photographs are made by G.F. Korzukhina’s order during her staying in Kiev in 1937-39.
The physical condition of photographs is satisfactory, their formats are different. The photographs are pasted onto 9 sheets of A4 format.
The Institute of History of Material Culture of the Russian Academy of Sciences is the holder of these documents. Access to documents is regulated by the rules, approved by the holder, in compliance with the Russian Federation legislation.
Copying of documents is possible in case of getting appropriate permission from the IHMC of the RAS Director, with reference to the document’s holder and author.

The Archival Department of the Berdychiv City Council;
14 Novoivanovskaya Str., Berdychiv, Zhytomyrska Area. 13300 Ukraine.
In the Archival Department of Berdychiv City Council there is a large array of documents relating to the work of Berdychiv Museum during the 1920-30’s (stored in 22 cases).
During World War II, the museum’s buildings (and documents from the museum archive) repeatedly suffered from fire, so now it is impossible to restore the original documentary collections. The documents stored within the Archival Department of the Berdychiv City Council, are part of a larger archive of the museum.
The documents were handed over to this archive after the dissolution of the museum in 1954. They were structured and filed into cases in the 1970’s, and were mainly arranged in chronological order.
We carefully processed all these documents. A number of organisational documents relating to the work of Rajki expedition were discovered. Copies (duplicates) of these documents are stored in the Central
Most of the documents relate to the work of the museum itself: here are financial documents, documents on the repair of museum buildings, documents on the flow of collections, documents on the museum staff etc. These documents are important for understanding the context and conditions of employment of T. Movchanovskiy and the Rajki expedition. In particular, thanks to these documents we cleared out some peculiarities of work of the reserve director, as well as some very complex problems, which he had to deal with. While working with these documents we uncovered the exact time and circumstances of the transfer of part of the archaeological collection concerning Rajki, to the Odessa Archaeological Museum. This happened in 1932, with an intention to supplement the Odessa museum with exhibits dated to ‘feudalism period’, in exchange for a collection of archaeological materials from Olbia to the exposition on ‘slave period’.

The physical condition of documents and their formats are different. In most cases the quality of document preservation is satisfactory. All documents are tightly fastened in folders. It makes copying and working with them difficult.

The Archival Department of Berdychiv City Council is the holder of these documents. Access to documents is regulated by the rules, approved by the holder, in compliance with the Ukrainian legislation in the sphere of archival activity.

Copying of documents is possible in case of getting an appropriate permission from the Director of the Archive, with reference to the document’s holder and author. Copying is a payable service.

Rajki Village

On our way from Berdychiv we carried out a visit to the village of Rajki. The trip was conducted in two phases. Initially, we found a place where the memorial was located, we inspected it to assess the current state of the object. This enabled us to better understand things while reviewing the photographic materials. In the second stage, we were talking with the local authorities. This brought us unexpected results. It turned out that in the village there is a historical memory associated with the research of the settlement in Rajki. The names of house owners, who let T.N. Movchanovskiy the rooms for rent during the excavations (the data completely coincided with our information), the study period, there is some data about T.N. Movchanovskiy. We have made arrangements necessary for collecting of this valuable information, with an assistance of the local history teacher. Hopefully in the future it will become part of the preserved archival records.

National Museum of History of Ukraine;
2 Volodymyrska Str., Kyiv, 01025. Ukraine.

The collections and exhibits of the National Museum of History of Ukraine comprise a collection of artefacts received at the excavations of the Rajki hillfort. There are indirect evidences of its transfer in 1930’s and further in 1950’s. No accompanying documentation dated to those years was revealed. Also there is no evidence confirming the fact that together with the artefacts collection some archival material of the expedition were transferred (field diaries, drafts, photos, etc.).

Central State Historical Archive of Ukraine in Kyiv;
24 Solomyanska Str., Kyiv, 03110. Ukraine.

We had no concrete information as to whether there are any documents of our interest in this archive. However, as we know what kind of collections are comprised in this archive (archaeologists'
collections, collections of State and public organisations focusing on archaeology), we decided to visit it. Having studied the archive catalogue, we came to the conclusion that it lacks any materials concerning the expedition in Rajki.

**Archive of Presidium of the National Academy of Sciences of Ukraine;**
54 Volodymyrska Str., Kyiv, 01001. Ukraine.
We visited this archive with a purpose to clear out the exact dates when T.Movchanovskiy started his work at the Institute of History of Material Culture (IHMC) and to get more details about his activities in Kyiv. We found the record, which informs us about the date when he got down to work in Kyiv (April 1933), and separate pieces of information about his activities in Kyiv. There is no material concerning the expedition at Rajki.

**Institute of Archives by the V.I.Vernadsky National Library of Ukraine;**
62 Volodymyrska Str., Kyiv, 04210. Ukraine.
We assumed that in this archive (collection ‘Documentary Collection of Ukrainian Scientists, Subjected to Repression in 1930-1950’s’, No. 257) it is possible to find documents, which had been withdrawn from Movchanovskiy at the moment of his arrest. We failed to find any.

**Domain State Archive Of the Safety Service of Ukraine;**
7 Zolotovoritska Str., 01034 Kyiv, Ukraine.
As a result of contacting this archive, it became clear that the case of the repressed T. Movchanovskiy was transferred to the Central State Archive of Public Organisations of Ukraine (Kyiv).

**Zhytomyr Museum of Local Lore;**
1 Zamkova Square, Zhytomyr 262014. Ukraine
Previously it was known that the museum contained collections of artefacts from the Rajki hillfort excavations. Our work revealed that the materials were transferred from Berdychiv Museum to the one in Zhytomyr at different times: firstly in the late 1930’s and then in the late 1940’s - early 1950’s. The main array of artefacts were transferred in connection with the dissolution of Berdychiv museum in 1954.
Together with a collection of artefacts the inventory books of the Berdychiv museum were transferred (these documents describe the museum collections). They also contain information about the time of receipt of material from archaeological excavations in Rajki by the Berdychiv Museum. These records are indirect information. Following the rules of inventory books storage, this kind of material can not be copied.
No archival documents (reports, field diaries, drawings, etc.) related to the Rajki expedition are available in the museum.

**State Archive of Zhytomyr Area;**
2/20 Okhrimova Gora Str., Zhytomyr 10003, Ukraine.
In the Zhytomyr Museum we were informed that part of the museum's documentation is kept in the Archive of Zhytomyr Area. After reading this documentation, we found that the archival documents of the Rajki expedition are missing.
Odesa Archaeological Museum by the National Academy of Sciences of Ukraine;
4 Lanzheronovskaya Str., Odesa, Ukraine.
We had been provided with information that the museum contained artefacts from the excavations in Rajki. The work revealed indirect evidences of this collection transfer in the early 1930’s. There are no supporting or archival documents relating to the collection available.

Federal State Culture Institution of the Russian Federation
‘The State Hermitage Museum’;
34 Dvortsovaya Naberezhnaya, St. Petersburg 190000. Russian Federation.
The collections of the State Hermitage Museum include a collection of artefacts from the excavations in Rajki. The collection was transferred to the Hermitage in 1951 from Berdychiv Museum in connection with the beginning of its dissolution. Documentation associated with this collection includes Acceptance Transmission for materials dated 1951, and records in the Hermitage inventory books for stored items. These documents are not directly connected with the research of the Rajki settlement and according to the rules of museum storage may not be copied.
Archival materials of the expedition led by T.M. Movchanovskiy were not provided to the Hermitage.

State Historical Museum;
1 Red Square, Moscow 109012, Russian Federation.
Artefacts from the excavations of settlement in Rajki have also been transferred to the State History Museum in connection with the dissolution of the Berdychiv Museum. It was accompanied with similar documentation (Acceptance Transmission and records in the inventory books), which also may not be copied. Our assumptions about the presence of any archival materials on expeditions in Rajki in the State Historical Museum of Russian Federation were not confirmed.

Scientific Archive of the Institute of Archaeology of the Russian Academy of Sciences;
19 Dmitriy Ulyanov Str., Moscow 117036, Russian Federation.
The search in the scientific archive of the Institute of Archaeology of the Russian Academy of Sciences was held in conjunction with our knowledge that scientists from Moscow visited Rajki during archaeological surveys or worked with T. Movchanovskiy in the auspices of other expeditions in Ukraine. Also there is indirect evidence that in Moscow the specialists conducted a number of technological analyses on artefacts from Rajki.
In the directory no archival documents relating to research in Rajki were found. We can not exclude the probability of accidental finds of documents, which were not recorded and included into the inventory. Therefore, at our request, archivists and our colleagues - archaeologists from the Institute of Archaeology, when working with archival documents will report any findings related to the research held by T. Movchanovskiy.

Museum of Berdychiv History;
18 Karla Libknekhta Str. (Sobornaya Square), Berdychiv 13300, Zhytomyr Area, Ukraine.
The museum in Berdychiv was established with the active participation of T. Movchanovskiy in 1925. In 1954 the museum was disbanded and its collections were sent to various museum institutions of the USSR (Zhytomyr, Kyiv, Moscow, St. Petersburg). In the 1980’s the Museum was re-established.
We assumed that the museum could preserve collections of artefacts from the excavations, and archival documents of the expedition in Rajki. However in the present museum there is no documentation related to its predecessor.

**SUMMARY**

While summarising, we wish to note that during the project we carried out work inside all the archives where we anticipated the availability of material on research of the hillfort in Rajki. As a result of this work we have found and processed all of the preserved documents and created a virtual catalogue of these documents.

In addition to documents that are relevant to the work of the expedition, we also found a large number of documents providing indirect information. However, they are important because they give an idea of the circumstances under which the excavations were carried out, the living conditions of the expedition participants, the political and economic situation in a certain region, etc.

New ideas about working with archival documents, copying them and preservation were obtained in the process of working in the archives and during training. Also, due to the purchase of equipment during the project, we were able not only to carry out the project activities, but also to start using this technique for copying selected documentary items in the scientific archive of the Institute of Archaeology of the NASU.
LIST OF ARCHIVAL INSTITUTIONS
where documentation regarding exploration of the Rajki hillfort is stored
(categories of documents are indicated)

1. The Scientific Archive of the Institute of Archaeology of the NAS of Ukraine
   - reports
   - field diaries
   - card diaries
   - inventory books
   - drafts
   - drawings
   - negatives on glass
   - photographs

COLLECTION
Title: Collection of Documents of Rajki Archaeological Expedition
Dates(s): 1925-1937
Extent: 3519 images from 559 text documents; 1030 images from the negatives on the glass, albums and photo collections; 147 images from 126 pictures and drafts; 1 film.
Medium of copies: digital photographs and (or) scanned image
Medium of original material: report – typewritten; field diary – handwritten; draft, photographic negative – on glass
Contributor(s): The Scientific Archive of the Institute of Archaeology of the NASU
Description: the collection keeps documents concerning the archaeological researches near Rajki village in 1925-1935.
Access: possibility of review and copying is limited, given the state and the age of the fund
Language(s): Ukrainian, Russian

INDIVIDUAL / FAMILY / INSTITUTION
Name: Rajki Archaeological Expedition Led by T.M. Movchanovskiy
Date(s): 1925-1935
History or biography: In 1925 and further in 1929-1932 the Rajki expedition led by the Berdychiv museum and personally by T.M.Movchanovskiy, carried out archaeological investigations of the Rajki hillfort on a large scales. In 1933 T.Movchanovskiy moves to Kyiv to continue his work. At the same time the function of management of the Rajki expedition is transferred to the Institute of History of Material Culture. The expedition was finalized in 1935, and later - in 1937 - its initiator T.Movchanovskiy was repressed and shot by NKVD. After his death all field documentation of the expedition and artefacts collection were disseminated among various archives and museums of Ukraine and Russia.
Place(s): Berdychiv-Kyiv

SERIES
Reference number: 01
Title: Scientific Reports
Date(s): 1929-1935
Extent: 285 images, 5 reports
Medium of copies: digital photographs and (or) scanned image
Medium of original material: report – typewritten
Creator(s): T.M. Movchanovskiy (supervisor) and the staff of the archaeological expedition in Rajki.
Description: the series contain annual scientific reports about the archaeological investigations of the hillfort near Rajki village dated by XII-XIII centuries.
System of arrangement: reports is a constituent part of funds belonging to different archives. The structure of funds of different archives is diverse. The reports copied by the project are listed here in chronological order.
Access: For research purposes only. Reference to the Institutions of Deposit of original documents is obligatory.
Language(s): Ukrainian

Reference number: 02
Title: Field Diaries
Date(s): 1929-1935
Extent: 748 images, 21 field diaries
Medium of copies: digital photographs and (or) scanned image
Medium of original material: handwritten
Creator(s): T.M. Movchanovskiy (supervisor) and the staff of the archaeological expedition in Rajki.
Description: the series contain annual scientific reports about archaeological investigations of the hillfort near Rajki village dated XII-XIII centuries.
System of arrangement: field diaries is a constituent part of funds belonging to different archives. The structure of funds of different archives is diverse. The reports copied by the project are listed here in chronological order.

Reference number: 03
Title: Card Diaries
Date(s): June, 1932 – August, 1935
Extent: 438 card, 876 images
Medium of copies: digital photographs and (or) scanned image
Medium of original material: handwritten
Creator(s): T.M. Movchanovskiy (supervisor) and the staff of the archaeological expedition in Rajki
Description: card diaries – is a category of scientific expedition documentation, which was developed by T.M. Movchanovskiy with a purpose to use it in everyday work to record results of archaeological work on separate plots (such as excavation site, plot, trench, square etc.) of the Rajki hillfort. Card diary forms are produced by printing house. The first case of use of card diaries was at the Rajki hillfort excavations. T.M. Movchanovskiy applied card diaries in many subsequent archaeological researches.
System of arrangement: card diaries is a constituent part of funds belonging to different archives. The structure of funds of different archives is diverse. The card diaries copied within the project are listed here in accordance with their storage order within the Scientific Archive of the Institute of Archaeology of the NASU: Storing Item (File) – Card No.
Access: For research purposes only. Reference to the Institutions of Deposit of original documents is obligatory.
Language(s): Ukrainian, Russian
Reference number: 04
Title: Inventory Books and Rosters of Artifacts
Date(s): 1929 (?) - 1936
Extent: 264 images, 12 inventory books
Medium of copies: digital photographs and (or) scanned image
Medium of original material: handwritten and typewritten
Creator(s): T.M. Movchanovskiy (supervisor) and the staff of the archaeological expedition in Rajki.
Description: the series include combination of inventory books and rosters of artifacts, which were found during excavations of the Rajki hillfort.
System of arrangement: inventory books and rosters of artifacts is a constituent part of funds belonging to different archives. The structure of funds of different archives is diverse. The inventory books and rosters of artifacts copied by the project are listed here in chronological order.
Access: For research purposes only. Reference to the Institutions of Deposit of original documents is obligatory.
Language(s): Ukrainian

Reference number: 05
Title: Drafts
Date(s): July, 1922 – 1935
Extent: 81 images
Medium of copies: digital photographs and (or) scanned image
Medium of original material: drafts (whatman paper, graph paper) of various sizes
Creator(s): T.M. Movchanovskiy (supervisor) and the staff of the archaeological expedition in Rajki (draftsmans)
Description: the series contain saved drafts (those on different research objects, plans of squares, stratigraphic characteristics (cuts) of cultural layers of the hillfort) of the Rajki archaeological expedition.
System of arrangement: card diaries is a constituent part of funds belonging to different archives. The structure of funds of different archives is diverse. The card diaries copied within the project are listed here in accordance with their storage order within the Scientific Archive of the Institute of Archaeology of the NASU: Storing Item (File) – Card No.
Access: For research purposes only. Reference to the Institutions of Deposit of original documents is obligatory.
Language(s): Ukrainian, Russian (for remarks and legends to the graphs)

Reference number: 06
Title: Pictures
Date(s): 1930-1935
Extent: 86 images, 45 files
Medium of copies: digital photographs and (or) scanned image
Medium of original material: pictures (on whatman and sheets from the drawings album) of various sizes
Creator(s): T.M. Movchanovskiy (supervisor) and the staff of the archaeological expedition in Rajki (draftsmans & painters)
Description: water-color and pencil drawings of different views on the excavated parts of the researched objects on the Rajki hillfort are combined into the series.
System of arrangement: pictures is a constituent part of funds belonging to different archives. The structure of funds of different archives is diverse. The pictures copied within the project are listed here in accordance with their storage order within the Scientific Archive of the Institute of Archaeology of the NASU.
Access: For research purposes only. Reference to the Institutions of Deposit of original documents is obligatory.
Language(s): Ukrainian (names, marks and legends)

Reference number: 07
Title: Photographic Negatives on Glass
Date(s): 1929-1935
Extent: 425 images
Medium of copies: scanned image
Medium of original material: Most of plates for the negatives are hand-made: plates made from the usual glass were cut; emulsion was washed ashore by the photographer. The state of most negatives is unsatisfactory: many of them are cracked and have spots, others have exfoliated emulsion, and lots of slabs are broken; highly required are: compilation of inventory lists, formation of photo-negatives catalogue, their immediate copying.
Creator(s): T.M. Movchanovskiy and the photographers engaged in the expedition: B.V. Kulkin (1930), S.I. Yakoubovskiy (1932), M.L. Makarovich (1933), V.I. Maslov (1933-1935) and other.
Description: the series contain photographic negatives made on glass; they illustrate the facts regarding the archaeological expedition in Rajki, which aimed to explore the hillfort dated XII-XIII centuries, situated near Rajki village.
System of arrangement: negatives on glass is a part of Collection of Negatives of the Scientific Archive of the Institute of Archaeology of the NASU. Within this list the negatives are managed according to their serial numbers.
Access: For research purposes only. Reference to the Institutions of Deposit of original documents is obligatory.
Language(s):

Reference number: 08
Title: Albums and Selections of Photos
Date(s): 1929-1939 (?)
Extent: 605 images, 23 albums and collections of photos
Medium of copies: scanned image
Medium of original material: photographs of various sizes and quality
Creator(s): T.M. Movchanovskiy (supervisor) and the staff of the archaeological expedition in Rajki.
Description: the series put together the albums and collections of photos of the Rajki expedition.
System of arrangement: photographs is a constituent part of funds belonging to different archives. The structure of funds of different archives is diverse. The albums and selections of photos copied within the project are listed here in accordance with their storage order: Archive. - Storing Item (File) – Number.

**Description:** Maslov’s diary with field notes and notes about expenses on a food in 1935.

**Language(s):** Ukrainian
Ster of finds, which ended, a staff list

An autograph in pencil on a blank paper, size 36x25 cm.

Medium of copies: digital photographs and (or) scanned image

Medium of original material: handwritten

Creator(s): T.M. Movchanovskiy (supervisor) and the staff of the archaeological expedition in Rajki

Description: card diaries is a category of scientific expedition documentation, which was developed by T.M. Movchanovskiy with a purpose to use it in everyday work to record results of archaeological work on separate plots (such as excavation site, plot, trench, square etc.) of the Rajki hillfort. Card diary forms are produced by printing house. The first case of use of card diaries was at the Rajki hillfort excavations. T.M. Movchanovskiy applied card diaries in many subsequent archaeological researches.

System of arrangement: card diaries is a constituent part of funds belonging to different archives. The structure of funds of different archives is diverse. The card diaries copied in the framework of this project, are listed here according to their storage arrangement system in the Scientific Archive of the IA of the NASU: Storage Unit (File) – Card No.

Access: For research purposes only. Reference to the Institutions of Deposit of original documents is obligatory.

Language(s): Ukrainian, Russian

Title: Plan of the Fortified Part of the Rajki Hillfort.
Date(s): No date (1935?)
Location of Original Material: The Scientific Archive of the Institute of Archaeology of the NASU. – Fund VUAK-IHMC/Rajki. – Storage unit 72. – No. 2.
Extent: 1 image
Medium of copies: digital photographs and (or) scanned image
Medium of original material: 4 leaves from exercise books of various size, glued together. The size of the whole sheet is 94×79 cm. The draft in pencil, scale: 1 cm = 2 m. On the plan there are handwritten notes in pencil. On the reverse of the leaf there are several small plans and schemes in pencil.
Creator(s): name unknown, expedition staff member
Description: on the leaf there is a plan of the hillfort with indication of the excavation site in 1935, divided into excavation squares.
Language(s): Ukrainian

Reference number: 051
Title: Pit-Like Dugout No. 6 on Square No. 25.
Date(s): August 25, 1935
Location of Original Material: The Scientific Archive of the Institute of Archaeology of the NASU. – Fund VUAK-IHMC/Rajki. – Storage unit 72. – No. 3.
Extent: 1 image
Medium of copies: digital photographs and (or) scanned image
Medium of original material: two leaves of the exercise book, size 28×21 cm. The draft in pencil, scale: 2 cm = 1 m. On the draft there are handwritten notes and corrections in ink-pen.
Creator(s): name unknown, expedition staff member
Description: on the leaf there are 2 plans of a dugout (a dwelling immersed in the ground) No. 6, which was explored on a square No. 25. On the reverse of the leaf there are 2 drawings in ink-pen.
Language(s): Ukrainian

Reference number: 052
Title: Square No. 28 of Plot VII.
Date(s): September 24, 1935
Location of Original Material: The Scientific Archive of the Institute of Archaeology of the NASU. – Fund VUAK-IHMC/Rajki. – Storage unit 72. – No. 4.
Extent: 1 image
Medium of copies: digital photographs and (or) scanned image
Medium of original material: two exercise book leaves glued together, size 47,5×21 cm. The draft in pencil, scale: 2 cm = 1 m. On the plan there are handwritten remarks in pencil.
Creator(s): name unknown, expedition staff member
Description: on the leaf there is a plan of square No. 28, plot No. 8 as of 1935.
Language(s): Ukrainian

Reference number: 053
Title: Plan of the Excavation of the Plot 12/35 on tenements to the West From the Hillfort Fortified Part.
Date(s): August 26, 1935
Location of Original Material: The Scientific Archive of the Institute of Archaeology of the NASU. – Fund VUAK-IHMC/Rajki. – Storage unit 72. – No. 5.
Extent: 1 image
Medium of copies: digital photographs and (or) scanned image
Medium of original material: an exercise book leaf, size 28×21 cm. The draft in pencil, scale: 0,5 cm = 1 m. On the draft there are handwritten remarks and corrections in ink-pen and pencil.
Creator(s): name unknown, expedition staff member
Description: on the leaf there is a plan of a plot, which was explored on tenements of the hillfort in 1935.
Language(s): Ukrainian

Reference number: 054
Title: Plot No. 8, Square 15-b.
Date(s): October 18, 1933
Location of Original Material: The Scientific Archive of the Institute of Archaeology of the NASU. – Fund VUAK-IHMC/Rajki. – Storage unit 74. – No number (Former archival No. A60/38).
Extent: 1 image
Medium of copies: digital photographs and (or) scanned image
Medium of original material: graph paper, size 45×32 cm. The draft in pencil, scale: 5 cm = 1 m. On the draft there are handwritten remarks and conventional signs (legend) in pencil.
Creator(s): name unknown, expedition staff member
Description: on the leaf there is a plan of square 15-b, plot No. 8, explored in 1933.
Language(s): Ukrainian

Reference number: 055
Title: Plot No. 8, Square 16-a.
Date(s): October 20, 1933
Location of Original Material: The Scientific Archive of the Institute of Archaeology of the NASU. – Fund VUAK-IHMC/Rajki. – Storage unit 74. – No number (Former archival No. A63/38).
Extent: 1 image
Medium of copies: digital photographs and (or) scanned image
Medium of original material: graph paper, size 40×32 cm. The draft in pencil, scale: 5 cm = 1 m. In the draft there are handwritten remarks in pencil.
Creator(s): Kotov E. (?)
Description: on the leaf there is a plan of square No. 16-a, plot No. 8, explored in 1933.

SERIES

Reference number: 07
Title: Photographic Negatives on Glass
Date(s): 1929-1935
Extent: 425 images
Medium of copies: scanned image

Medium of original material: Most of photographic plates is produced unprofessionally; they are made of ordinary glass, the photographer spread the emulsion by hand. The state of most negatives is unsatisfactory: many of them are cracked and have spots, others have exfoliated emulsion, and lots of slabs are broken; highly required are: compilation of inventory lists, formation of photo-negatives catalogue, their immediate copying.

Creator(s): T.M. Movchanovskiy and the photographers engaged in the expedition: B.V. Kutkin (1930), S.I. Yakoubovskiy (1932), M.L. Makarovîch (1933), V.I. Maslov (1933-1935) and others.

Description: the series contain photographic negatives made on glass; they illustrate the facts regarding the archaeological expedition in Rajki, which aimed to explore the hillfort dated XII-XIII centuries, situated near Rajki village.

System of arrangement: negatives on glass are part of the Collection of Negatives of the Scientific Archive of the Institute of Archaeology of the NASU. Within this roster the negatives are listed in accordance with their archival numbers and sorted on this basis.

Access: For research purposes only. Reference to the Institutions of Deposit of original documents is obligatory.

Title: Remains of the Living Crate: Burnt Wooden Wall Balks
Date(s): 1932-1935 (?)
Location of Original Material: The Scientific Archive of the Institute of Archaeology of the NASU. – Collection of Negatives on Glass. – No. 5663.
Extent: 1 image
Medium of copies: scanned image

Medium of original material: the negative size is 13×18 cm; the photographic plate is broken, there are cracks on it; over the emulsion there is a number of the negative stated and photographer’s remarks; scale ruler is missing.
Creator(s): name unknown, photographer of expedition

Description: the picture illustrates the process of the Rajki hillfort exploration; the exact date and the shot’s author are unknown.

Reference number: 005
Title: A Plot of the Excavation Site on the Territory of the Hillfort: Trench of a Building
Date(s): 1933-1935 (?)
Location of Original Material: The Scientific Archive of the Institute of Archaeology of the NASU. – Collection of Negatives on Glass. – No. 5664.
**Reference number:** 006  
**Title:** Stones on the Bottom of the Hillfort Ditch  
**Date(s):** 1932-1935 (?)  
**Location of Original Material:** The Scientific Archive of the Institute of Archaeology of the NASU. – Collection of Negatives on Glass. – No. 5665.

**Description:** The picture illustrates the process of the Rajki hillfort exploration; the exact date and the shot’s author are unknown.
